A corrigendum on

Self-reported sleep disturbances in patients with dissociative identity disorder and post-traumatic stress disorder and how they relate to cognitive failures and fantasy proneness

by van Heugten – van der Kloet D, Huntjens R, Giesbrecht T and Merckelbach H. *Front Psychiatry* (2014) 5:19. doi:10.3389/fpsy.2014.00019

CORRIGENDUM

Page 2, Material and Methods, paragraph 1

This should read

“(…) 27 female PTSD patients who reported childhood sexual and/or physical abuse (mean age: 40 years, SD = 12.9), and (…) Education was assessed on a scale from

1 (low) to 7 (high) (1). The DID group had a mean of 5.25 (SD = 1.48) years of education, the PTSD group had studied for a mean of 5.04 years (SD = 0.90), and the controls had finished a mean of 5.82 years of education (SD = 0.98).”

Page 2, Results, paragraph 1, third sentence

This should read $F(2, 93) = 5.64, p < 0.001$

Table 3, DID group model 4, R^2

This should read $R^2 = 0.18$
