## KEYWORDS

academically relevant media multitasking, academically irrelevant media multitasking, self-regulation strategies, flow experience, academic performance

## A Correction on

[The impact of relevant versus irrelevant media multitasking on academic performance during online learning: a serial of mediating models](#)

By Fan L, Pan C, Bai X and Li S (2025) *Front. Psychiatry* 16:1599827. doi: 10.3389/fpsy.2025.1599827

In the published article, there was an error in the **Funding** statement. During manuscript preparation, a grant number was inadvertently copied from another document and pasted into the **Funding** section, resulting in the inclusion of an entirely unrelated project number. The **Funding** originally read: "The author(s) declare financial support was received for the research and/or publication of this article. This study was supported by the National Natural Science Foundation of China (31800921)."

The correct **Funding** statement appears below.

"The author(s) declare financial support was received for the research and/or publication of this article. This study was supported by Tianjin Philosophy and Social Science Planning project (TJXX22-007)."

The original article has been updated.
