A Corrigendum on

The Discomfort of Riding Shotgun – Why Many People Don't Like to Be Co-driver

by Ittner, S., Mühlbacher, D., and Weisswange, T. H. (2020). *Front. Psychol.* 11:584309. doi: 10.3389/fpsyg.2020.584309

In the original article, there was a mistake in **Table 4** as published. In the published article, all entries were marked as having significant correlations, although this was only true for a subset. However, the values in the table and their discussion in the article were stated correctly and therefore this correction does not change the content or conclusions of the article. The corrected **Table 4** appears below.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.

TABLE 4 | Pearson correlations of characteristics of uncomfortable situations.

Characteristics (<i>N</i> = 24)	Discomfort	Safety Critical	Anxiety Body	Anxiety Vehicle	Exposed Situation
Safety Critical	$r = 0.49^*$	–	–	–	–
Anxiety Body	$r = 0.43^*$	$r = 0.43^*$	–	–	–
Anxiety Vehicle	$r = 0.42^*$	$r = 0.52^*$	$r = 0.60^*$	–	–
Exposed Situation	$r = 0.56^*$	$r = 0.39$	$r = 0.36$	$r = 0.68^*$	–
Trust in Driver	$r = 0.02$	$r = -0.12$	$r = 0.00$	$r = -0.12$	$r = -0.43^*$

Note. Significant ($p < 0.05$) correlations are marked with *.
