KEYWORDS

letter-position encoding, cognate recognition, multilink, masked priming lexical decision task, 2-alternative forced-choice task

A corrigendum on Disentangling the role of deviant letter position on cognate word processing

by Comesaña, M., Haro, J., Macizo, P., and Ferré, P. (2021). *Front. Psychol.* 12:731312. doi: 10.3389/fpsyg.2021.731312

In the published article, there was an error in the wording of the **Funding** statement. The Funding statement previously stated: “This study was conducted at the Psychology Research Center (CIPsi/UM), School of Psychology, University of Minho, supported by the Foundation for Science and Technology (FCT) and FEDER through COMPETE2020 under the PT2020 Partnership Agreement POCI-01-0145-FEDER-007653. This was been also funded by the Spanish Ministry of Economy and Competitiveness (PCIN-2015-165-C02-02 and MINECO/FEDER), by the Spanish Ministry of Science, Innovation and Universities (RED2018-102615-T), and by the Research Promotion Program of the Universitat Rovira i Virgili (2018PFR-URV-B2-32).”

The corrected **Funding** statement appears below:

This study was conducted at the Psychology Research Center (CIPsi/UM) School of Psychology, University of Minho, supported by the Foundation for Science and Technology (FCT) through the Portuguese State Budget (UIDP/01662/2020). This was also funded by the Spanish Ministry of Economy and Competitiveness (PCIN-2015-165-C02-02 and MINECO/FEDER), by the Spanish Ministry of Science, Innovation and Universities (RED2018-102615-T), and by the Research Promotion Program of the Universitat Rovira i Virgili (2018PFR-URV-B2-32).

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
