A Corrigendum on

A Disease Pathway Framework for Pain Point Identification and Elaboration of Product Requirements Across Patient Care Plan Using Innovation Think Tank Global Infrastructure by Haider, S., Goenka, A., Mahmeen, M., Sunny, S., Phan, T., Mehdi, S. A., Hassan, D. M., and Weber, E. (2022). *Front. Public Health* 10:862384. doi: 10.3389/fpubh.2022.862384

In the original article, there was an error. “We have provided all developed 22 impacting disease pathways in pdf format as the **Supplementary Files** because of the size constraints for the journal publication.”

A correction has been made to **Results**, in the last paragraph:

“The pathways framework is a holistic approach, which institutions can use to collect their own pain points for their relevant stakeholders and come up with their customized solutions.”

We received some important feedback regarding the **Supplementary Files** that they should be removed as precautionary measure for avoiding misunderstanding about the data presented, which need to be regularly updated. Therefore, for important reasons and on urgent basis, we request that the **Supplementary Files** should be removed. The removal of the **Supplementary Files** does not change the subject matter of the proposed framework.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
