A Corrigendum on

Evaluating the equity of access to community health service centers in different regions of China based on cyclability and walkability

by Xu, Z., Chang, J., and Han, C. (2025). Front. Public Health. 13:1563750. doi: 10.3389/fpubh.2025.1563750

In the published article, there was an error. The wrong value was used for the radius. A correction has been made to Abstract. This sentence previously stated:

"Results show that the cyclability scores for the eastern, central, and western regions were 0.71, 0.64, and 0.46, respectively, below the national standard of a 3,000-meter service radius, highlighting insufficient cycling access to primary care for older residents."

The corrected sentence appears below:

"Results show that the cyclability scores for the eastern, central, and western regions were 0.71, 0.64, and 0.46, respectively, below the national standard of a 1,000-meter service radius, highlighting insufficient cycling access to primary care for older residents."

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
