rubella, incidence, descriptive study, joinpoint regression model, China

A Correction on

Long-term trends in rubella incidence across various regions and age groups in China, 2004–2021

by Su, Y., Su, Z., Huang, Z., Yang, S., Li, Z., and Li, H. (2025). *Front. Public Health*. 13:1566999. doi: 10.3389/fpubh.2025.1566999

The reference for [15] was erroneously written as “Zhu Z, Wang HL, Zhang Y. Analysis of serum IgM antibody and viral nucleic acid detection results in measles and rubella cases in China from 2014 to 2023. *Chinese J Prev Med.* (2024) 8:1318–23. doi: 10.3760/cma.j.cn112150-20240306-00191”. It should be “Zhu Z, Wang HL, Zhang Y. Analysis of serum IgM antibody and viral nucleic acid detection results in measles and rubella cases in China from 2014 to 2023. *Chin J Prev Med.* (2024) 8:1318–23. doi: 10.3760/cma.j.cn112150-20240306-00191”.

There was a mistake in [Figures 1, 4, 5, 6, 7 and 8](#) as published. To ensure academic rigor, we have rechecked the data and performed additional analyses using the latest procedures, providing more accurate data and higher-resolution figures. The corrected [Figures 1, 4, 5, 6, 7 and 8](#) appear below.

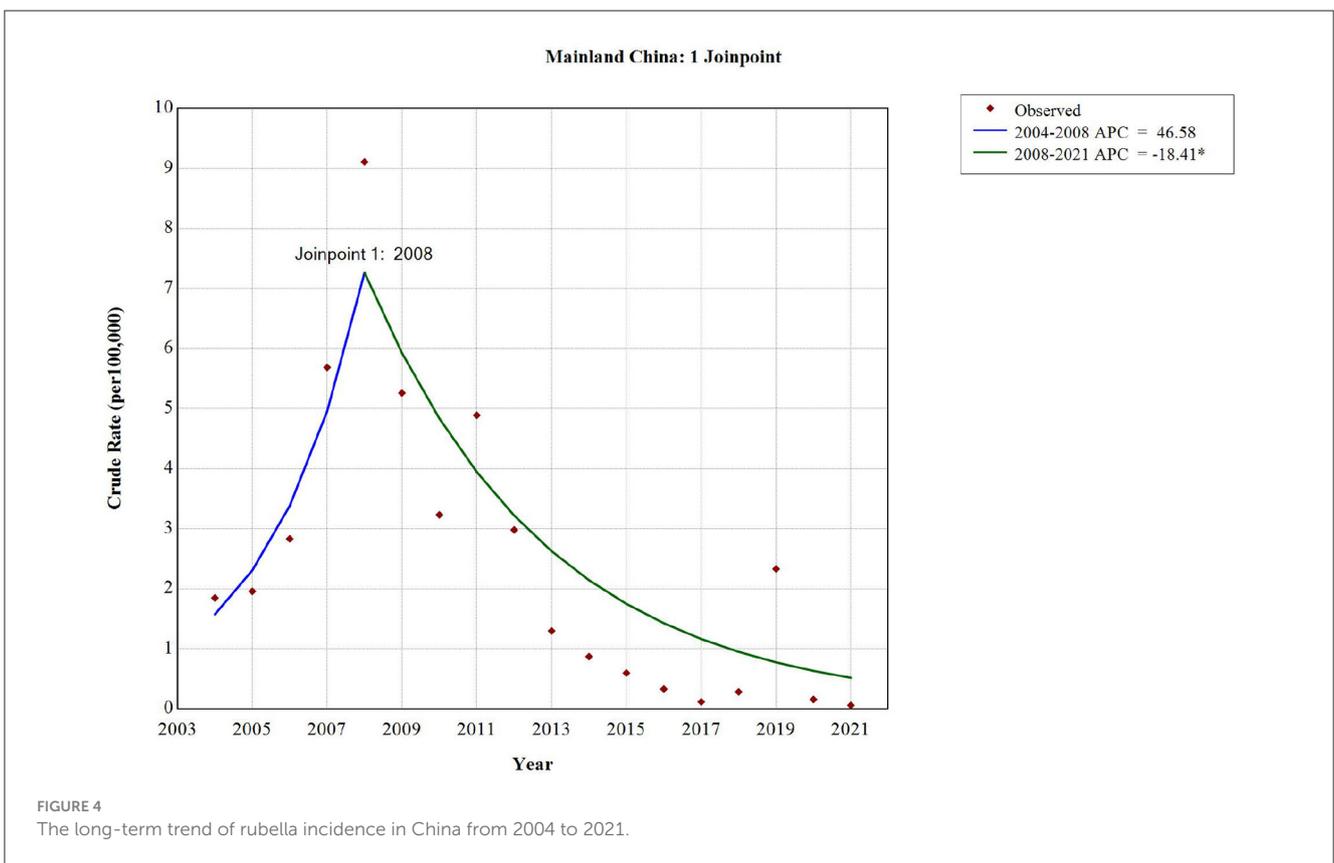

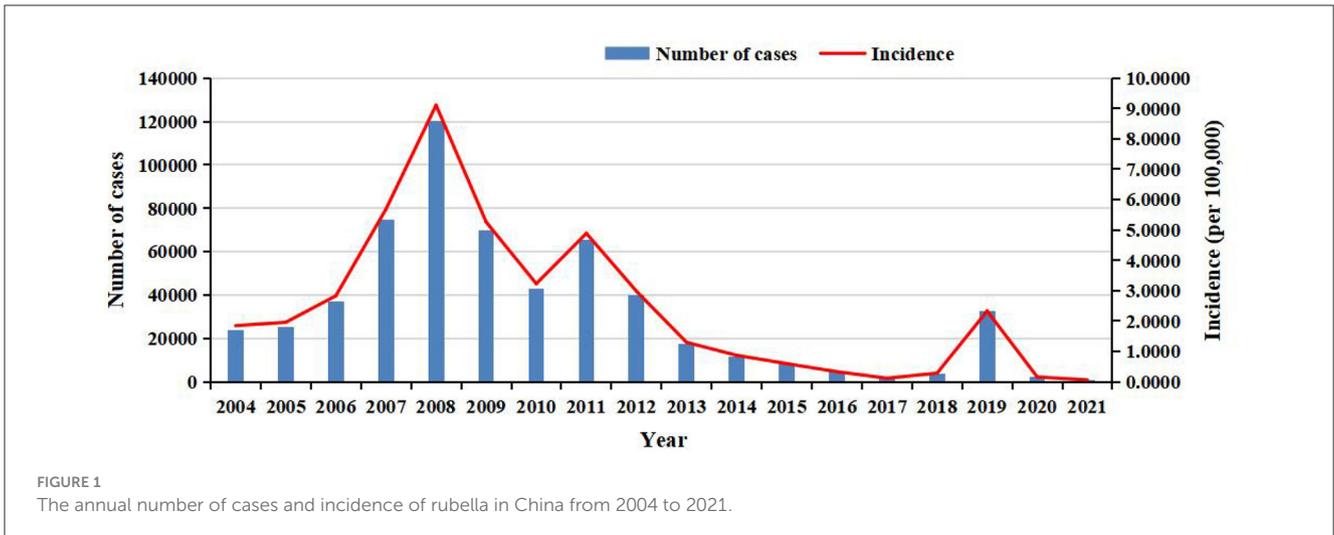

There was a mistake in [Tables 1 and 2](#) as published. To ensure academic rigor, we have rechecked the data and performed additional analyses using the latest procedures, providing more accurate data. The corrected [Tables 1 and 2](#) appear below.

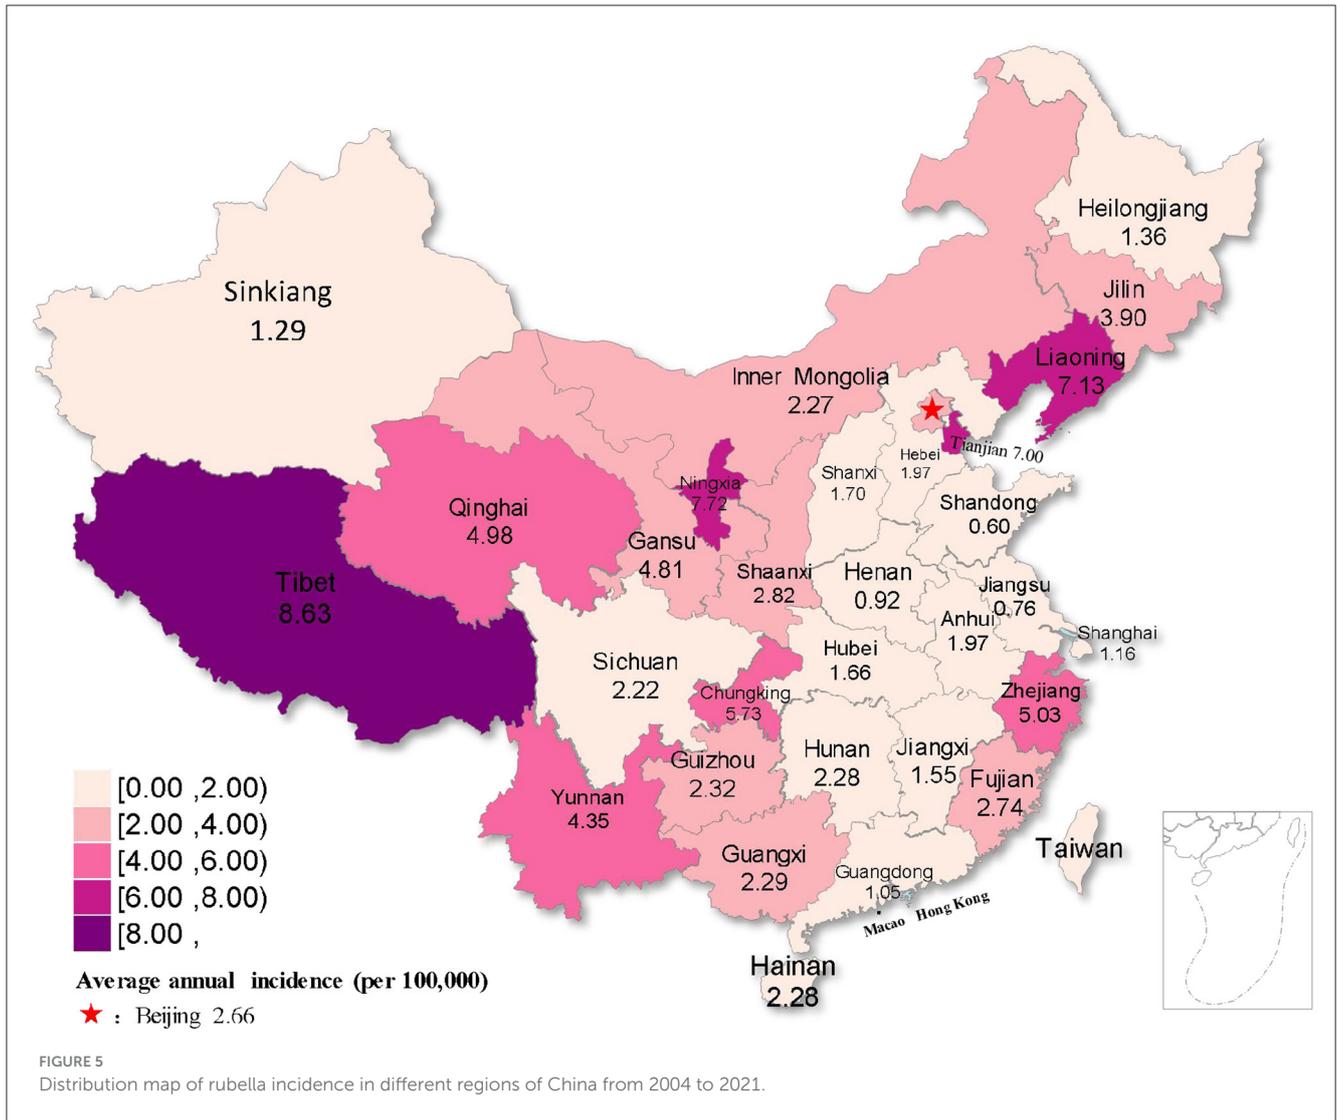

A correction has been made to **Section 2.2 Research methods, 2.2.1 Basic statistical description, paragraph 1**. The text “(incidence = number of cases/number of exposed population *100,000%)” has been changed to “(incidence = number of cases/number of exposed population *100,000).”

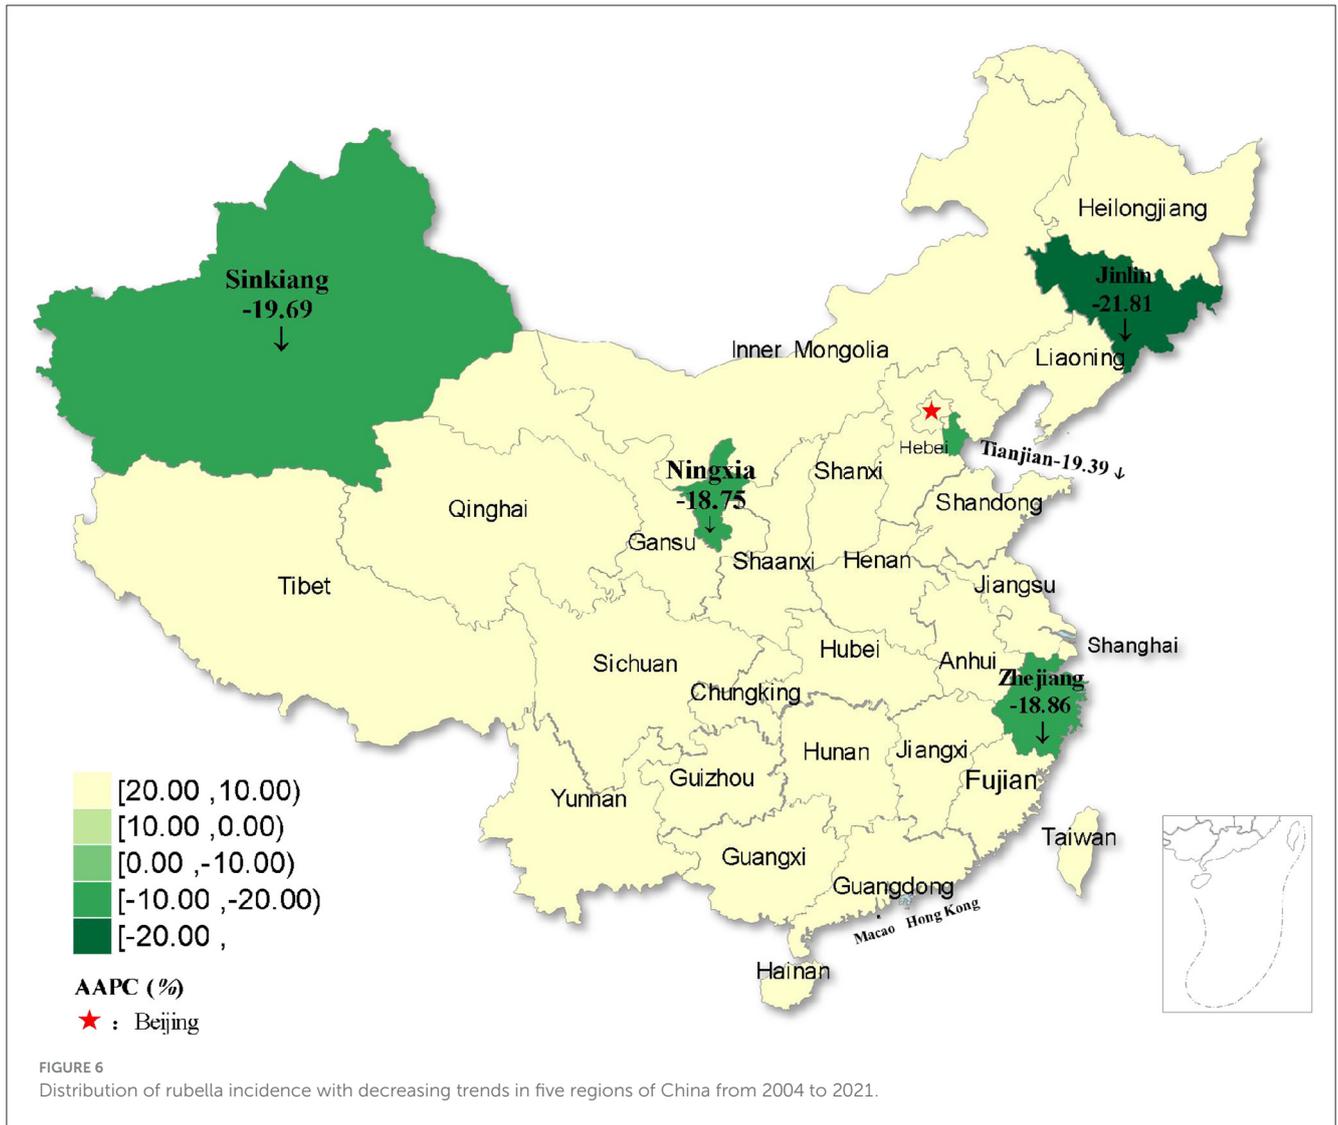

The original version of this article has been updated.
