probiotics, nutritional value, weaned piglets, growth performance, fermented feed

A corrigendum on

Three-stage fermentation of the feed and the application on weaned piglets

by Jiang, D., Yang, M., Xu, J., Deng, L., Hu, C., Zhang, L., Sun, Y., Jiang, J., and Lu, L. (2023). *Front. Vet. Sci.* 10:1123563. doi: 10.3389/fvets.2023.1123563

In the published article, there was an error. The terms “glycine” and “ β -glycine” were used when it should have been “glycinin” and “ β -conglycinin”.

A correction has been made to the **Abstract**, paragraph 1. The sentence previously stated: “Trypsin inhibitor, glycine and β -glycine were reduced by 79.86, 77.18, and 69.29%, respectively.”

The corrected sentence appears below:

“Trypsin inhibitor, glycinin and β -conglycinin were reduced by 79.86, 77.18, and 69.29%, respectively.”

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
